GS4

Gasoline System Test Bench

OVERVIEW

GS4 | GS8

Gasoline System Test Bench

Test and clean up to 8 injectors at once, fast, accurate, profitable.

EVERY GASOLINE INJECTOR. ONE BENCH.

From K-Jetronic to the latest GDi, from marine to LPG. The GS8 and GS4 test, clean and restore up to 8 (or 4) injectors in one automatic cycle. No guesswork. Just measured results.

9 Injector Families
Total System Coverage
One bench for gasoline, marine, motorcycle, LPG & more.

±1 ml
Injection Volume Metering
Measured accuracy, not guesswork.

One Press
Fully Automatic Testing
Automatic test cycles with auto-drainage.

GASOLINE INJECTORS • WORKSHOP-CLASS SERVICE

Dirty injectors are a slow, hidden expense for the consumer, rough idle, hard starts, rising consumption, fading power, and a catalytic converter cooking toward a four-figure repair. The GS8 / GS4 turns that hidden fault into a measured, billable diagnosis before the car leaves your workshop.

TOTAL SYSTEM COVERAGE

- **Solenoid Direct Injectors:** GDi, FSI and equivalents, bench-tested up to 10 bar
- **Multi-Port & Single-Port:** MPFi / SPFi
- **Central-Port & Throttle-Body:** CSFI / CPFI · TBI / CFI
- **Continuous Injection:** K-Jetronic mechanical systems
- **Marine & Motorcycle:** E-TEC / FICHT · commuter to racing*
- **LPG & Alternative Fuels:** coverage that most don't offer

ENGINEERED FOR PRECISION

- **Fully Automatic Function:** one press runs the test plan; auto-drainage resets the tubes between cycles; dynamic & static modes
- **iVM: Injection Volume Metering:** LED-illuminated graduated tubes deliver a real number - 1 ml resolution, ±1 ml per 130 ml
- **iSPC: Illuminated Spray Pattern Chamber:** see the cone, see the fault
- **iRF: Automatic Injector Reverse Flush:** drives out the debris ultrasonic cleaning loosens but leaves behind
- **eRSO: Electrical Resistance, Short & Open Circuit Test:** catch the dead coil before wasting a cleaning cycle on it
- **Injector Leak Test:** seat and seal integrity confirmed in the routine
- **Electronic Pressure Control 0 – 10 bar:** repeatable, machine-set (electric-pump source)
- **42 kHz Sweep Ultrasonic Cleaning:** degas* and controlled heater; engineered cleaning, not a bare tank (baths up to 120 L*)

BEYOND GENERIC CLEANERS

- **Measured, not guessed:** ±1 ml metered volume replaces "compare the tubes by eye." You sell a number, not an opinion.
- **Automatic, not manual:** automatic cycles and auto-drainage mean more jobs per day, fewer operator errors
- **Nine injector families on one bench:** with a clear upgrade path to high-pressure GDi. European engineering, global support.
- **The biggest adaptability in the market:** universal fittings and adapters for every application out there; easily upgradeable, future-proof by design
- **2-year full warranty, globally:** backed by a real support network on every continent

ERGONOMICS

- **Compact, lightweight standalone footprint**
- **Single-phase** 100 – 240 VAC, 50/60 Hz
- **LCD interface with language localization**
- **4 L tank with automatic drainage**
- **Universal fittings & adapters included**

Built to Move the Industry Forward.

From advanced testing equipment and connected intelligence to technical expertise and global support, Carbon Zapp brings every solution together in one complete ecosystem.

Let's Connect and Discover Future Opportunities.
